Senior Mobile Application Developer with 5 years of Android/Flutter (Java/Kotlin/Dart) & iOS App Store Publishing (via Flutter), delivering scalable government and enterprise-grade mobile applications. Strong expertise in Kotlin, Dart, Android SDK, Flutter, MVVM/Clean Architecture, Kotlin Coroutines, Flow, Retrofit, Room Database, REST APIs, WebSockets, Firebase Auth, Crashlytics, FCM, Firestore, GetX, JIRA, Agile/Scrum, and payment gateway integrations including Razorpay. Proven experience in multi-tenant, flavor-based applications and AI-assisted development using Claude, Cursor, and GitHub Copilot to improve code quality and delivery speed. Open to remote opportunities and available to work from home.

Skills

Programming Languages	Mobile Development	Architecture & Practices	State Management	Version Control	AI-Assisted Development
• Java, Kotlin, Dart	• Android SDK, Flutter • Jetpack Libraries (ViewModel, LiveData, Room), Firebase (Auth, Firestore, FCM), Crashlytics, Analytics • REST APIs, JSON, XML • Dio, HTTP, Retrofit, WebSockets • Razorpay	• MVVM, MVC, Clean Architecture • SOLID Principles, OOP • Unit Testing • Bug tracker • Kotlin Coroutines, Memory Optimization • Pixel-Perfect UI, Responsive Design	• Riverpod • Provider • GetX	• Git • Subversion • Bitbucket	• ChatGPT, • Claude(free / Pro / Max), • Grok, • Gemini, • Cursor, • Antigravity For fast development

Work Experience

Total It Experience: 8 years 4 months | Mobile Dev Experience 5 years

Bcits Pvt Ltd, Bangalore

Mar 2025 - Feb 2026

Android Developer

(1 year)

- Used AI-assisted tools (ChatGPT, Claude, Grok, Cursor) to analyze large codebases, troubleshoot production issues, and improve maintainability of government-scale mobile applications.
- Developing and maintaining government metering solution applications serving multiple state governments with 7500+ active devices. Built **pixel-perfect, responsive UI** layouts targeting multiple screen sizes and Android / IOS / web OS versions.
- **Consumer App (Flutter Android + IOS + web)** - Built flavor-based multi-state government application enabling users to monitor power consumption, manage prepaid/postpaid meter recharges, and track power outages in detail across different state governments
- **Play Store Links (Android):**
 - [Bangalore- BESCO \(10K+ downloads\)](#)
 - [Mysore- CESC \(500+Downloads\)](#)
 - [Hubli- Hescom \(1K+ downloads\)](#)
 - [Sikkim- Sikkim Power Connect \(10K+ downloads\)](#)
 - [Nagaland- Smart Meters-Nagaland \(100+ downloads\)](#)
 - [Gujrat- PGVCL \(100K+ downloads\)](#)
 - [Mangalore- MESCOM \(10+ downloads\)](#)

Also provide sdk/.aar file for TN98(Rajasthan), HPSEBL(Himachal Pradesh), DOPAP(Arunachal Pradesh).

- **App Store Links (Ios):**
 - Bangalore- BESCO

- [Mysore- CESC](#)
- [Sikkim- Sikkim Power Connect](#)
- [Gujrat- PGVCL Smart Meter App](#)
- **Officers App (Flutter)** - Developed comprehensive field operations app for government workers to check meter connection statistics, survey installation spots, and manage on-ground activities.
- **Survey App (Java/Android)** - Created field survey application for site assessment and data collection for new meter connections.
- **MDM System (Java/Android)** - Maintained a custom Mobile Device Management platform managing **7,500+ dedicated Android devices** issued to government field employees. These locked-down devices run a **private enterprise app store** where only authorized apps are accessible — workers use the **Meter Reading App** during inspections, **Survey App** for new connection site assessments and relocations, and **Officers App** for supervision — all within a controlled, government-grade device ecosystem.
- Collaborated with cross-functional teams to ensure seamless integration with backend services and government databases
- **Key Projects:** Consumer App (Flutter), Officers App (Flutter), Survey App (Android), MDM System (Android)

PiTangent Analytics and Technology Solutions Pvt Ltd, Kolkata

Sep 2021 - Feb 2025

Software Engineer

(3 years 6 months)

- Integrated AI-assisted development into daily workflows to speed up feature implementation, refactor legacy modules, and improve overall development efficiency across multiple projects.
- Designed and developed 11 mobile applications including e-commerce, CRM, farming management, and fintech solutions
- **Traders Terminal (Flutter/MVC)** - Built paper trading learning platform with real-time live market data using WebSockets, virtual trading, student enrolment system, SharedPreferences, and go-router. Implemented responsive UI with Media Query for seamless experience across screen sizes.
- **Rural Flock (Kotlin/MVVM)** - Developed a comprehensive goat and bird farming management application with inventory tracking, health monitoring, and analytics features.
- **Home Dome/SPUN (Flutter/Clean)** - Created Urban Company-style service marketplace where professionals list services and customers book appointments for one-time or monthly subscriptions, go router, and notifications.
- **EWA (Kotlin/MVC)** - Engineered automated salary withdrawal requisition system with secure authentication, approval workflows, and instant processing.
- **My Field Heroes (Kotlin/MVVM)** - Implemented employee work tracking and management system with real-time location updates, task assignment, and performance monitoring.
- **Property Bricks (Kotlin/MVC)** - Developed tenant management platform for property owners with rent tracking, maintenance requests, and document management.
- **Pats CRM (Kotlin/MVC)** - Built a quick client management application for a business team with contact details, interaction history, and database integration.
- **Heatloss Calculator (Java/MVC)** - Upgraded existing engineering calculation tool with video tutorials and enhanced UI (Play Store published)
- **Mall App (Java/MVC)** - Created shopping mall directory application showcasing shops, offers, products, and location-based services
- Achieved 20% performance increment (Apr 2023) and 60% increment (Apr 2022) recognizing exceptional contributions
- Integrated third-party APIs using **Retrofit** and **Dio**, including payment gateways (Razorpay), Google Maps, and Firebase services. Managed local data persistence with **Room Database** and optimized **memory usage** across multiple production applications.
- Followed **Agile/Scrum** methodology with sprint planning, daily standups, and code reviews. Used **ViewModel** and **LiveData** for lifecycle-aware UI updates across Kotlin-based applications.
- **Key Projects:** Traders Terminal, Rural Flock, Home Dome (SPUN), EWA, My Field Heroes, Property Bricks, Pats CRM, Heatloss Calculator, Mall App, Bill Generation App

Iconwizard Technologies Pvt Ltd, Kolkata

Mar 2021 - Aug 2021

Trainee Android Developer

(6 months)

- Completed professional Android development training and contributed to client projects.
- **Tutopia Channel Sale (Java/MVC)** - Developed student registration and tutorial management system with enrollment tracking, class scheduling, and record maintenance for online tutorial classes.
- **Bill Generation App (Java/MVC)** - Built retail billing application with invoice generation, product catalog management, and payment processing

- Learned and implemented modern Android development practices including MVVM architecture, Jetpack components, and best coding practices
- Collaborated with senior developers on code reviews, unit testing, and deployment processes.
- **Key Projects:** Tutopia Channel Sale, Bill Generation App.

Mother Dairy Fruits and Vegetables Pvt Ltd, Ranchi
Electro-Mechanical Engineer

Jan 2017 - Apr 2020
(3 years 4 months)

- Supported Java-based SCADA system for compressor automation in cold storage facilities, ensuring optimal temperature control and energy efficiency
- Performed logic modification, tag configuration, alarm tuning, and event scripting to enhance system reliability and operational efficiency
- Troubleshot PLC-SCADA communication protocols (OPC/Modbus) and resolved system-level software issues to minimize downtime
- Utilized SCADA analytics for maintenance planning and performance optimization, improving equipment reliability
- Managed industrial electro-mechanical systems and maintenance operations as third-party service provider
- Coordinated technical teams for equipment installation, troubleshooting, and preventive maintenance
- Transitioned career focus toward software development and mobile application engineering

M/S MB Construction Pvt Ltd, Kharagpur
33/11KV Substation Maintenance Worker

Aug 2014 - Apr 2016
(1 years 9 months)

Education

Online Manipal University, Jaipur
Bachelor of Computer Applications (Online BCA)
Technique Polytechnic Institute, Hooghly
Diploma in Electrical Engineering (Regular)
Midnapore Collegiate School, Midnapore
Madhyamik (10th) Examination

Sept 2022 - Nov 2025
Percentage 80.8% / **CGPA:** 8.08/10
Sept 2011 - Nov 2014
Percentage: 69.8%
Sept 2005 - Nov 2011
Percentage: 66.65%

Awards and Certificates

- Kotlin Development Course - Udemy
Dec 2021
- Android Professional Training - Ejob India, Kolkata
Jul - Oct 2020
